Introduction

After reading our story about ocean animals in class, now it is up to you to pick 3 and research a little bit more about them!

Task

Objectives learner will complete

- You will know the name of three **ocean** new animals.
 - You will know **three** things about the animals.
 - You will go gather what you learned into a report.
-

Process

Steps to do tasks

1. Pick a **friend** to work with.
 2. Use the **ocean** link to look up the three animals.
 3. Talk and organize the facts as a friend.
-

Resources

Evaluation

Rubrics, statements of measurements

| | Developing | Qualified |
|---|---|--|
| Spent enough time to learn three things about animals | Spent at least half of the time on task during webquest and small group time | Spent most of the time on task during webquest and small group time |
| Organized the information into a report or drawing | Put the information into an understandable form with significant errors | Organized the information into an understandable and neat form with more than two errors |
| Shared the information Orally with a friend | Information on at least two animals was shared with a friend, some details were missing | Information on three animals was fully shared with a friend |

Conclusion

You have learned how to work with a friend. You have also learned how to better research things on the internet and organize the things you find on line. You also got to learn more about your three ocean animals and the three ocean animals you picked!
